

OBAMACARE ROBBING SENIORS

By Woodrow Wilcox

Recently, Medicare has hurt two of our clients in a similar way.

In each case a patient needed to be transported from one hospital to another. In each case, a doctor recommended transport by ambulance. In each case, the first hospital could not help the patient with the specific medical need and the receiving hospital could. In each case, the patient's usual physician was affiliated with the second hospital.

In each case, Medicare refused to help pay for the ambulance transport of the patient. In each case, the patient (or surviving spouse) appealed the decision. In each case a doctor gave a letter that explained the medical need to transport the patient to the other hospital. In each case, the appeal was denied and Medicare "stuck" the senior citizen patient with the ambulance bill.

This has happened only recently in my over eight years of helping senior citizens with Medicare bill problems. It has happened since the passage of "Obamacare".

The "Obamacare" law gutted over half a trillion dollars of scheduled Medicare benefits to senior citizens in order to "give" health care to other people.

A key reason that Medicare is facing financial problems is because of this "transfer of wealth" from senior citizens to other people which occurred as a direct and proximate result of the passage of "Obamacare".

In my opinion, the "Obamacare" law is the most anti-senior citizen law that was ever passed and signed. President Obama, Senator Harry Reid, Representative Nancy Pelosi, and anyone else who supported "Obamacare" should be ashamed for "robbing" senior citizens as they did.
